INFORMATION CARD
DAINIPPON PRINTING CO LTD
Inventor(s):TAKITA MITSURU

Application No. 05233356 JP05233356 JP, Filed 19930920,A1 Published 19941213

Abstract: PURPOSE: To provide the merit of an optical card equipped with an optical recording part and to write information changing with time or required to be changed by recording the information, which is not required to be changed with its recording contents, in the optical recording part and recording the information required to be changed in an IC recording part.

CONSTITUTION: This card is formed by providing an optical recording part 3 and an IC recording part 4 on a card base 2, this IC recording part 4 is composed of an IC module integrating electric elements including an IC chip and a wiring circuit, and this IC module is embedded in the card base 2. Thus, an information card 1 is provided with the optical recording part 3 and the IC recording part 4, concerning this information card 1, the items requiring no change such as a seal impression pattern, fingerprint, (✓) face photograph and voiceprint personal identification number, are recorded in the optical recording part 3 and the items changing with time or required to be changed such as the total amount of deposit, the remainder of deposit and the history of use are recorded in the IC recording part 4.

Int'l Class: G06K01907; B42D01510 B42D01510 G06K01908 G11B00724
